

#1053 derived Butterfly bend and corresponding eye knots

Illustrations showing 4 possible corresponding eye knots derived from #1053 Butterfly bend.  
 Note: There are actually a total of 6 corresponding eye knots (if taking chirality into account)

**TIB**

#1053 Butterfly eye knot (TIB mid-line version).  
 This appears to be the only transformed eye knot (of this type using inter-linked overhand knots) that can be made 'TIB' by uniting the 2 tails. Compare this to the transformed Zeppelin eye knot created from united tails (which isn't TIB).

**TIB**

#1053 derived Butterfly eye knot (TIB – Tiably In the Bight)  
 This is a remarkable 'EEL' structure when cinched very tight into a compact dressing state.
